

Life is not black or white. We are a mosaic of interests, choices and experiences. Why should we choose between Art and Science when we can have both? When we can be both.

-Filippa, founder

In **Drama Science Lab** we believe in each person's individuality. We believe in each participant's unique learning style and background. That is why we bring drama on board. **Drama techniques** have the power of creating a strong dynamic in any team that enhances each participant's skills.

Most people correlate drama with performance, multiple rehearsals and, of course, an audience. In our workshops we engage individuals in science by utilizing drama. We improv on scenarios that are infused with science.

Using drama & education techniques, using our body and our mind, our memories and our experiences, we create new ones. We build on old information and experience and we create knowledge and something new, that now makes sense. We embrace drama techniques as Drama & Education does. Having in mind the legacy that Dorothy Heathcote left, we create a science experience that inspires the participants and motivates them to love science.

“

**the universe
is made of stories,
not of atoms**

In The Drama Science Lab we use drama techniques to approach scientific ideas.
 We don't do drama in order to perform.
 On the contrary, we improv, we play and all while, we adjust our scenario which is infused with a scientific idea. We craft our own story that now makes sense.

In The Drama Science Lab workshops:

children

- develop emotional and cognitive skills (collaboration, communication skills, critical thinking, self confidence, concentration, memory)
- have fun
- learn how they learn by reflecting on their experience
- apply their discoveries to future scientific learning
- improve their overall classroom performance

- learn how to think "out of the box"
- learn how to be creative and spontaneous
- try to switch their mindset when problem solving
- practice emotional and cognitive skills
- have fun

adults

prior information

knowledge & the feeling of "now it makes sense"

In our workshops we wear comfy cloths and we move around. We play, we do drama and we explore our minds' landscape. We try to understand how or why something works and we reflect this experience at the end of the session.
 Our workshops are designed based on each group's needs and preferences, background knowledge and setting. Each workshop's duration can vary and so may the location (it can be a 2h drop-in session in a library or a 4-month After School Club).

Would you love your school, museum or team to do one of our workshops? Do you have a crazy idea that you want to share? Contact us

at info@thedramasciencelab.com
 Would you love to participate in one of our workshops? Follow us on social media, visit our website and subscribe to our newsletter so you can be first to learn about any upcoming events.
